

FORDFIELD
NURSERY LIMITED
ESTABLISHED 1988

BACKGROUND

Fordfield House Nursery was established in 1988 as a quality environment for children to grow, learn and develop through play.

We fully understand the value of providing a warm and nurturing setting where parents feel content to leave their children. Most importantly we understand that children need to feel comfortable in a supported learning environment where they lead the way and the staff nurture them.

We have two nursery sites each of which is set in beautiful rural surroundings and they provide the perfect backdrop for outdoor learning and activities.

We care for our children from birth to school age. Our dedicated team of experienced staff are committed to providing a stimulating and educational atmosphere where children reach their full potential.

Our aim is for children to leave us content and confident with new skills that will carry them through their lives.

We appreciate that choosing which nursery to send your child to can be a daunting task for parents and that is why we try to make the process as simple as possible. Simply start by arranging

The children at Fordfield experience a rich curriculum delivering a wide variety of learning experiences. Some of these activities include:

- Swimming
- Outdoor play
- Cooking
- Gardening in the Allotment
- Painting
- Reading
- Cycling

a visit where a member of the management team will be on hand to answer any questions you may have. Trial sessions can be arranged to see how your child enjoys the experience.

SWIMMING

All nursery children are given a fantastic opportunity to access the heated indoor swimming pool on the Millbrook site.

These confidence building sessions with carers and teachers lead to ASA awarded and approved swimming lessons. Structured, small groups with qualified staff. These lessons continue after your child leaves to go to school. The lessons at Fordfield can take your child up to level VI.

Why? Knowing how to swim is a MUST - it is a skill that could ultimately save you or your child's life. Learning to swim at any age sets up a means for keeping fit for the rest of your life.

Swim sessions are arranged through your child's class once you have registered a place at nursery and become a client. Children naturally progress into swimming lessons by ability and development. This is coordinated by swimming teachers.

“ Giving you peace of mind that your children are in a safe and secure environment. ”

AFTER SCHOOL & HOLIDAY CLUBS

When your child leaves to go to school they can continue their relationship with Fordfield by attending the after school and holiday clubs. This allows you as parents to balance commitments, giving you peace of mind that your children are in a safe and secure environment.

For your children our after school club has a very relaxed feel, we fully appreciate that children can be tired at the end of a long school day and may simply just want to “chill out” during their time with us. Unlike our bustling holiday clubs where children are encouraged to choose the activities they wish to take part in as well as time for supervised free play, giving children a chance to catch up with old friends or make new ones.

At both clubs the children are offered opportunities inside and outside as we understand the importance of fresh air and physical exercise. The children are massively involved in cooking activities, and are provided with a well balanced homemade tea and dessert.

The clubs are for children to play and learn where the children have fun as they take part in the selection of activities, varied to reflect different needs, interests and abilities, whilst also learning some key life skills.
